One Soviet Hostage Is Killed in Beirut: * Truce Is Demanded

... By Andrew Tarnowski

BEIRUT - One of the four Sohostage was shot to death Wednesday, and the Moslem kidnappers threatened to kill the other three unless their demand for an end to lighting in the northern city of Tripoli was met.

Police found the body of Arkady Katakov, 32, the consular secre-tary, in Moslem-controlled West Beirut.

Twelve hours later an anonymous caller, claiming to speak for the kidnappers, told an international news agency the other three hostages would be freed if attacks on "Moslem Tripoli" stopped.

"Failing this, we will continue to execute the hostages and will hold the Soviet Union to its responsibility for restraining its stooges in Lebanon," the caller said.

U.S. Looking For Ex-CIA Officer Called Double Agent

By Stephen Engelberg

WASHINGTON - Federal authorities are searching for a former officer of the CIA who has been identified by a Soviet defector as a four Frenchmen double agent, according to Reagan administration officials.

The former officer was identified Tuesday as Edward L. Howard. The officials said he had held an "operational" post with the Central Intelligence Agency.

They would not say in what country Mr. Howard had served, although another source said he had access to "significant" infor-mation that could have been dam-

aging if given to the Soviet Thion.

According to an intelligence source, Mr. Howard worked for the agency's clandestine service under the deputy director for operations. This official said Mr. Howard was believed to have fled the United

The Associated Press, quoting a State Department document, said Mr. Howard had worked for the Agency for International Development from 1976 to 1979 and was assigned by the State Department.

to Moscow in 1983.] While it has been revealed that some former CIA officers have sold. classified agency documents to Soviet agents, officials said there was no record that an officer of Howard's status had been found to have worked on a continuing basis for

the Soviet Union. The officials said Mr. Howard left the CIA about one and a half years ago to take a job as an economic analyst with the New Mexico legislature in Santa Fe.

Philip Baca, director of the finance committee for which Mr. Howard worked, said Mr. Howard had resigned, effective Sept. 22, for "personal reasons." Mr. Baca would not discuss the case, but said he had been interviewed by "feder-al officials" who assured him that their investigation did not concern Mr. Howard's legislative work. Mr. Baca said Mr. Howard was a "low-key guy" in his "early 30's, perhaps 32 or 33," married and

Rock Hudson Dies After AIDS Battle

By Joseph Berger. New York Times Service

LOS ANGELES - Rock Hudson, 59, whose name was synonymous with masculine good looks in Hollywood films for more than a decade, died in his sleep Wednesday after a battle with the incurable disease AIDS.

Mr. Hudson's publicist, Dale Olson, said the actor died at his Bev-erly Hills home. The cause of death has not been determined, but it was AIDS-complicated," he said. Mr. Hudson's acting career ended with a recurring role last season on the television series "Dynasty."

In the middle of 1984 it was discovered he had acquired immune deficiency syndrome, and on July 21 he was rushed to the American Hospital of Paris, where he stayed only a few days before returning to Hollywood.

His ravaged appearance shocked

rend to the gathering. "I am not Texas rancher in "Giant," a 1956 In all, he appeared in 62 films. 1959, "Ic happy that I have AIDS, but if that role that earned him an Academy After the success of "Giant" and his la is helping others, I can, at least, Award nomination, and a series of made him one of the top box office in 1980.

had some positive worth."

The most common victims of AIDS are homosexuals, intravenous drug users and hemophiliacs. Rumors persisted for years that his looks provoked. Mr. Hudson, contrary to his image

of a lady's man, was homosexual:

People magazine reported that Mr. Hudson had been a homosexual since he began in films, and that his 1955 marriage to his agent's secretary, Phyllis Gates, was set up by Universal Studios to discourage of his stepfather, Wallace Fitzgerthe rumors. The couple separated ald. the following year and were di-vorced in 1958. Mr. Hudson never

Qadhafi Cancels Plans to Visit UN

UNITED NATIONS, New York (NYT) — Colonel Moamer Qadhafi, the Libyan leader, has canceled plans to visit the United States for ceremonies later this month to mark the 40th anniversary of the United

Nations, according to a Libyan official. Foreign Minister Ali Treiki told the UN secretary-general, Javier Pérez de Cuéllar on Monday night that Colonel Qadhafi would not visit because of "American threats against Libya" and "recent American measures taken against UN personnel of Libya and other countries,"

according to a report of the meeting.

On Sept. 15, a U.S. law took effect restricting travel of UN employees from Libya, the Soviet Union and four other nations. Mr. Treiki said that the action ran contrary to the UN charter. "We think that the time has come to move the UN headquarters if the United States continues taking

Top Soviet, Chinese Ministers to Meet

BEIJING (Reuters) - A senior Soviet diplomatic official said Wednesday that the Chinese and Soviet foreign ministers had agreed to exchange visits, the first such meetings since relations between the two nations deteriorated in the early 1960s.

"We have agreed in principle to exchange visits," the Soviet Union's deputy foreign minister, Leonid F. Byichev, said at Beijing airport after arriving for the seventh round of talks on normalizing Chinese-Soviet

China's foreign minister, Wu Xueqian, met his new Soviet counterpart, Eduard A. Shevardnadze, for the first time in New York last week and they exchanged invitations, the official Xinhua news agency said the next day. But that report did not specify whether they had accepted. WASHINGTON (AP) - Republican congressional leaders said Wednesday that they had little hope for passage of a tax-revision bill this year, and they reported to President Ronald Reagan that there are serious divisions in the House Ways and Means Committee.

The Senate majority leader, Robert J. Dole, of Kansas, said that if his chamber gets the bill from the House by Nov. 1, "that will give us time to sent this ways although it "mill be user close."

act this year," although it "will be very close."

The House minority leader, Robert H. Michel, of Illinois, said that even if the House meets the Nov. 1 deadline, the bill "may be in such form that this president simply could not buy it."

But Mr. Kunene said the pota-Bargain Wine Bill Vetoed in California

SACRAMENTO, California (LAT) - Governor George Deukmejian has vetoed as "unfair to consumers" legislation that would have outlawed bargain sales of prestige European wines and domestic wineries.

Rejected Tuesday by Mr. Deukmejian, the wine bill was an attempt to stamp out a flourishing "gray market" that has been outmaneuvering authorized wine importers and undercutting authorized prices by as much as 50 percent.

The recent bargains have been made possible by the U.S. dollar's strength abroad and by a two-tiered price structure that French

wineries have maintained for their buy the wines on the European top wines — a lower price for Euro-pean consumers and a higher price still are able to undercut the price for Americans, Gray marketeers of official importers.

5 Policemen Hurt in Stuttgart Protests

FRANKFURT (UPI) - Hundreds of demonstrators throwing fireworks and paving stones battled police Wednesday in Stuttgart on the fifth day of rioting in West Germany. Five police were hurt and 200 protesters were arrested.

There has been daily violence in 15 cities since the death of Guenther Sare at a leftist demonstration against a rally of the extreme-rightist

National Democratic Party. More than 600 arrests have been made. The demonstrations turned violent Saturday after a demonstrator was crushed by a police vehicle in

Bonn Wants Draftees to Serve Longer

BONN (AP) — The West German cabinet moved Wednesday to offset a projected drop in the country's armed forces by extending active duty

The measure, if approved by the parliament, would take effect July 1, 1989, a government spokesman said. Currently, all West German men age 18 and over who are physically fit must serve 15 months. The ernment wants to maintain the peacetime force at 495,000. The Defense Ministry has warned that military strength could fall below 300,000 by the end of the 1990s if something is not done.

The cabinet also voted to extend the period of "alternative service," or

civilian jobs for conscientious objectors, from 20 to 24 months, the

BULL, the leading European manufacturer of information processing and office automation systems, provides European companies with a genuine alternative. In the four main areas of information processing, BULL offers coherent ranges of products.

BULL DPS is the family of general purpose computers designed to cover the specific needs of every size of organisation, from the smallest to the largest. At each level, an optimized version of GCOS - the General Comprehensive Operating System - ensures smooth evolution and upgrade in a 40 to 1 range of processing

BULL SPS systems form a family of powerful, sophisticated, specialized minis and super-minis for engineering, scientific and real-time applications in manufacturing and research.

The BULL Questar range of multi-purpose, ergonomic ter-

minals and workstations, is designed specifically for distributed information and office automation systems. BULL Micral family of professional micro-computers combines high performance single and multi-user workstations with

industry standards compatibility. The DSA network architecture, adhering to international standards, enables all of these systems to communicate within homogeneous or mixed networks.

BULL tailors its solutions to the customer's specific needs, in cooperation with software houses, and in a close dialogue BULL, the tree of communication,

tence he questioned. Mrs. Heckler's supporters and of nuclear proportions" that he critics say that her case was an example of how Mr. Regan has succeeded in making his job as chief of staff different from that of his predecessors. Under him. the White House has become hierarchical. The Regan team, an official said with pride last week, "carries

out his directions."

It is not new for a Reagan chief of staff to take aim at a member of the cabinet. Mr. Baker openly called for the removal of Secretary of Labor Raymond J. Donovar when Mr. Donovan came under investigation for alleged links to mob figures. Several White House officials, including Mr. Baker and Edwin Meese 3d, then a White House counselor, participated in the conflicts that led to the resignation of Secretary of State Alexander M. Haig.

White House officials also played key roles in the resignations of James G. Watt as secretary of the Interior Department and Anne M. Burford as head of the Environmental Protection Agency.

But in all of these resignations the president remained distanced from the maneuverings of his aides. They never put him in the public position of dismissing a cabinet member, or of trying to represent a dismissal as akin to a promotion. For a long succession of Reagan chiefs of staff, both in Sacramento when he was governor of California and in Washington, it was axiomatic that Mr. Reagan was uncomfortable with personnel decisions and that he "never fired anybody."

White House gave embattled cabi- eral. Her appointment was made in net official an opportunity to find from the cabinet, said of Donald T.

part to blunt charges of unfairness in administration policies dealing with the poor. But by most accounts, Mr. Regan's objections were almost entirely to Mrs. Heckler's political manner and personal style rather than her ideology.

"She was very individualistic and wanted to deal with the president directly," said a senior White House official. Mrs. Heckler, the official said, didn't conform "to Regan's idea of what a Cabinet

secretary ought to be."
Associates of Mr. Regan said he arrived in the White House determined to replace Mrs. Heckler. His negative views may have been reinforced by Jack Svahn, the chief of policy development and then Mrs. Herkler's deputy, who considered her a poor administrator, Mrs. Heckler fought back, which only increased Mr. Regan's determination to dismiss her, officials said. The chief of staff prepared "talking points" for the president, one of which described the Dublin post as

"She refused to hear the signals," the official said. a "promotion." A White House official said Mr. Reagan, who proud of his Irish roots, agreed to

some old ideas," an official said "and have not brought in an offer in the same ballpark as what we were talking about."

The official said that the sense of disappointment was especially underscored by a Moscow proposal that, essentially, would allow the Russians to proceed with deployment of two land-based intercontinental missiles, the SS-24 and SS-25. However, it would bar the United States from deploying an array of nuclear weapons in early stages of development.

An administration official said of the Soviet proposal that it was "premature to write it off," echoing a view that the measures were negotiating positions that could be soft-

But another official said that it appeared as if U.S. arms control proposals had "made no dent in their thinking" and that, for the moment, the Russians appeared to have "put something down which is

close to being nonnegotiable."

Mr. Reagan brushed aside a question Tuesday about the Soviet offer, saying, "This is in the hands now of the negotiators."

Officials said the Soviet proposals included 50-percent cuts in U.S. long-range and medium-range nuclear weapons while the same reduction would involve only longrange Soviet weapons. The Soviet proposal was described as a renewed attempt to reduce U.S. nu-clear systems based in and near Europe and capable of hitting the

Soviet Union. Moscow, the officials said, had offered no similar limits on its medium-range nuclear weapons based

in Europe. ■ Negotiators Meet Again

U.S. and Soviet negotiators on long-range nuclear forces met Wednesday. The Associated Press reported from Geneva.

The session between teams headed by John G. Tower and Viktor P. Karpov lasted two hours and 10 minutes at the Soviet mission to the United Nations.

The date of the next session was not announced under a policy introduced for security reasons in the second round of talks.

President Hosni Mubarak of Egypt expressing his anger over Israel's attack on the PLO headquarters in Tunisia.

U.S. Says Air Attack on PLO By Israeli Jets Was Justified

Admiral Becomes U.S. Military Chief Crowe, Citing Budget, Stresses Need for Cooperation

New York Times Service with a call for greater cooperation invasion of Grenada in 1983. among the army, and marines.

In remarks at a ceremony Tuesday outside the Pentagon, Admiral Crowe said that "the need for joint operations, joint thinking, and joint leadership has never been greater" as the military confronts of shedding your individual service the end of its budgetary buildup. Admiral Crowe, 60, the former

commander in chief of Pacific and Indian Ocean forces, succeeded General John W. Vessey Jr. to become the 11th chairman of the Joint Chiefs. As such, he is the senior military adviser to the presi-

dent and the secretary of defense. Several proposals are pending in Congress that would strengthen the chairman's hand in minimizing interservice rivalries. Critics have

Admiral Crowe digressed from and hopefulness Tuesday to address a pointed comment to the 400 gress is balking at adding to the military officers who serve on the current \$300 billion a year. military officers who serve on the staff of the Joint Chiefs.

broader concerns of the joint arena," he said. "The fact is, however. that the need for joint operations, joint thinking and joint leadership has never been greater as we meet the global challenges, and in order to get the most out of our finite

Skilled and Articulate

George C. Wilson of The Washington Post reported:

Admiral Crowe can be witty, intellectual and tough, but above all he is a skilled practitioner of the art of the possible.

"My father used to say, 'Your mind is like a parachute. If it won't open when you need it, it is not much good. I have an open mind." Other Croweisms charmed Dem-ocrats and Republicans at the admiral's confirmation hearing before the Senate Armed Services Committee, where Senator Sam Nunn, Democrat of Georgia, called

him "the right man in the right place at the right time." Admiral Crowe (the name rhymes with "brow,") is seen by some as potentially the most articulate and appealing U.S. military spokesman in years.

"He's the best we've got," said a navy contemporary. "The only place he's weak is in operational experience. He hasn't done anything at sea since he was a lieutenant commander on a diesel submarine. But he's smart enough to put people around him who are operators and, better yet, to listen to

uniform usually is slightly rumpled, is one of the few officers to rise far in the navy after rejecting offers from the autocratic Admiral Hyman G. Rickover to move from diesel to nuclear submarines.

Born in La Grange, Kentucky, 1965. An academic career of that Chiefs was created in 1949.

to wasteful duplication in weapon caliber usually leads no higher in mander or captain.

Now that he has reached the top Chiefs of Staff and began his duties confusion in such operations as the in the military hierarchy, at the top of his agenda will be the Pentagon budget. After voting a trillion dol the usual expressions of gratitude lars for defense during President Ronald Reagan's first term, Con-

For Admiral Crowe, lowered ex-"I am well aware of the difficulty pectations will mean trying to keep peace between the chiefs of the inorientations and addressing the dividual services as they light to save prized programs.

He also will face congressional attempts to overhaul the generous military retirement system, which likely will make recruiting more difficult as the available pool of

qualified youths drops sharply. Events are likely to force Admiral Crowe to take a larger role on arms control issues than did General Vessey, who in almost four years as chairman never had to take any harder position than listing the pros and cons of continuing to observe the SALT-2 treaty limits on

nuclear missile launche The president and Congress soon will ask Admiral Crowe and the service chiefs to comment not only on the advisability of abiding by SALT-2 but also on the scrap-ping or amending of the Anti-Bal-listic Missile Treaty with the Soviet Union. If SALT-2 limits are scrapped, the chiefs will have to judge whether the potential for an unlimited number of warheads ieopardizes Mr. Reagan's concerof a space-based strategic defense

nst nuclear missiles. Admiral Crowe almost certainly will be asked by the Reagan administration to work with Philippin officials to save the bases at Subi Bay and Clark. Navy officers said he impressed Mr. Reagan last year in Hawaii, when he gave the president a 90-minute briefing without notes on the challenges in the Pacific. The president, they said, re-marked to to Caspar W. Weinberger, the secretary of defense, "If we ever need a new chairman, this is

the guy."
Besides the international issues. Admiral Crowe must deal with the proposed reorganization of the Joint Chiefs.

Under a compromise bill pend-ing in the House Armed Services amittee, the Joint Chiefs' staff Admiral Crowe graduated from the of 400 would be placed under the U.S. Naval Academy in 1946, then sole direction of the chairman. Iowa Law Aiding Farmers * Is Activated by Governor

By James R. Dickenson

WASHINGTON - Governor Terry E. Branstad has proclaimed an economic emergency in Iowa, automatically activating a state law that enables farmers to go to court and request a one-year reprieve from foreclosure of their mort-

gages.
The debt-moratorium law requires farmers to make interest payments, but does not guarantee that any moratoriums will be grant-

Mr. Branstad, a Republican, has been pressured by farm groups for months to proclaim the emergency

and put the law into effect. A spokesman for the governor said that about 40 percent of Iowa's 110,000 farmers were in severe financial trouble.

Mr. Branstad said Tuesday in current farm bill expired Monday to send a signal "designed to tell Washington, in a loud and clear voice. We need help in the heart- tives overwhelmingly defeated a

It is estimated that the federal Farm Credit Administration may commodities next year.

foreclose on 10 percent to 12 percent of its farmer borrowers na-tionwide this fall.

Although the law does not guarantee a farmer a reprieve from foreclosure, it places the burden of proof on the lender before foreclos-

The lender must demonstrate that he helped the farmer restructure his debt as advantageously as possible, that he helped the farmer get into federal and state aid pro-grams and that the farmer had failed to make interest payments.

Bankers urged Mr. Branstad not to invoke the moratorium because it was likely to force them to leny loans to farmers in the worst finan

cial straits. ■ House Works on Farm Bill

DOONESBURY

Forced Resignation of Barletta Seen As Army Move to Halt Murder Inquiry

By James LeMoyne PANAMA CITY - When the Panamanian Army forced the country's president to resign last week, it apparently was an effort to bury a growing murder scandal and to end a power struggle within the armed forces, according to Pana-

The army commander, General Manuel Antonio Noriega, returned from a trip to Europe on Sept. 25 to squelch unrest. The military coup probably was provoked, the political analysts said, by public demands for an investigation into the torture and decapitation two weeks ago of one of the army's leading critics, Dr. Hugo Spadafora.

manian and foreign political ex-

Although no one seems to be absolutely certain of the chain of events, it appears that to soothe his opponents in the officer corps, General Noriega felt it necessary to depose President Nicolás Ardito Barletta, which he did Friday,

Mr. Barletta had hinted that he might appoint a commission to mvestigate Dr. Spadafora's killing. Several Panamanian political leaders, pointing to strong circumstan-tial evidence, say the killing almost certainly was carried out by the army, although perhaps not on General Noriega's orders.

Selected to become president by General Noriega, Mr. Barietta al-ready was falling from favor be-cause he had failed to revice the country's economy. He had alienated virtually every sector of Pana-manian society with ineptly presented policies that offered the sour medicine of tightening taxes, cutting protecting tariffs and reducing privileges for labor unions, several sources in Panama City said.

According to Panamanian and foreign political analysts, General Noriega summarily summoned Mr. Barletta from the United Nations General Assembly meeting in New York on Thursday night.

Mr. Barletta initially refused to resign, but finally gave in after being held and threatened for 14 hours, according to members of Mr. Barletta's family and other highly reliable sources.

an official report by the Costa Ri-can police presented to the Costa Rican government, Dr. Spadafora tried to slip across the border into Panama on Sept. 13. His decapitated body was found the next day just across the border, inside Costa Rica, stuffed in an old U.S. mail-

that the Panamanian Army may have killed Dr. Spadafora. In their investigation, the Costa Rican police found two witnesses who gave sworn testimony that they had seen Dr. Spadafora being detained by a Panamanian corporal at a military checkpoint on entering Panama. Dr. Spadafora's body also had a symbol cut into it that read "F-8,"

according to the report. The authorities are not sure what the letter and number denote, but last year the army had a special unit known as "F-7" that served as a paramilitary force to repress political opponents during the presiden-tial election, according to well-informed sources in Panama. The mysterious circumstances, but the sources speculate that "F-8" may be the name of a new army unit or death squad.

Spadafora left to become an adviser to Miskito Indian rebels.

In recent months, however, Dr.

Some political analysts speculate that Dr. Spadafora was killed by a group within the army to force for the property of his how line with opponents or to embar-

You can also judge the quality of a European car by its success in the toughest non-European markets.

BMW is one of the fastest growing exclusive car manufacturers in both the USA and Japan.

One way of recognising a car's quality is by its sales success in the really tough, highly competitive international market. And by its success with the kind of demanding drivers, who never accept a reputation at its face value, but are determined to know exactly what level of technical competence lies behind it. however high-sounding the name. It's with this type of buyer in particular that BMW is held in such high regard all over the world.

For instance, take the US over the past 8 months: with an increase in sales of 26%, BMW has without question been one of the fastest growing of all European manufacturers in that car-conscious country.

And in Japan, a country recognised for its critical appreciation of technological innovation, BMW has produced an impressive 35% increase in sales over the previous year.

Again, a significantly better performance than any other comparable manufac-

The reason behind this worldwide success? A sum of ultra-modern. high quality technologies that you just can't find in such abundance on any competitive car.

That's why, for instance, knowledgeable drivers of exclusive compact cars everywhere are no longer satisfied simply with the "Made in Germany" mark of quality.

Today, they are also increasingly looking for the "Made by BMW" symbol of innovation.

That's because the remarkable feature of all BMW cars, and especially its range of exclusive compact cars, is not so much the obvious gap between them and their second-class competitors, as the striking difference between them and every other so-called comparable

We think it's well worth your while taking a closer look at those fundamental differences. And that's an area where we belleve we can give you some valuable and highly relevant hints.

Electronic fuel injection.

You'll be surprised how many cars with impressive-sounding names, and equally impressive price tags, still offer you only conventional carburettor technology. Not so BMW.

For BMW the word "exclusive" means. more than anything else, the very latest technologies.

That's why you'll discover that every BMW from the 3-Series 318i gives you all the performance, economy and environmental "friendliness" of electronic fuel injection - virtues that not only make a car contemporary but also contribute to its value in a strictly economic sense.

Digital Motor Electronics.

These days, any manufacturer with pretensions to quality, who doesn't offer Digital Motor Electronics (DME) in his model range, simply isn't offering you the best in engine technology. With BMW DME is a standard from the 325i. Digital Motor Electronic's completely computerised engine control system means significant advantages in terms of fuel composition and ignition timing, giving you far-reaching benefits in the areas of performance, consumption and exhaust emissions. And that again is the kind of technological progress you'll search for in vain on any competitive car.

6 cylinders from 2000 cc.

6 cylinder engine gives you noticeably greater running refinement than 4 or 5 cylinders. With BMW you can take a 6-cylinder engine for granted from 2 litres up (from 320i). The fact that 6-cylinder smoothness is a prerequisite for true class is doubly underlined by the way other manufacturers invariably feature it in their "upper class" and upper-priced models. It's also why people who prefer a 2-litre car, but don't want to sacrifice anything in driving refinement, always choose BMW.

It goes without saying that an in-line

Electronic safety technology.

BMW has never believed in reserving the best in technology for its more expensive flagship models.

Especially when it comes to safety. That's why we offer the very latest ABS anti-lock braking system and the newest Airbag safety concept as options even on our compact range. But we don't stop there. You'll even discover that you can also

have the world's most sophisticated integrated engine/transmission management system on a compact BMW, when you choose the optional BMW 4-speed automatic transmission with its electronic-hydraulic controls and 3 special direct-change gear programmes. All in all, the BMW 3-Series range offers you a level of technological sophistication that makes it abundantly clear what you have a right to expect today from a top-quality compact car. Sadly for some, but fortunately for us, you'll only find progress like that on a

A quick glance at any price vs performance chart will prove quite clearly to you that in terms of overall economy and value for money, there's really no better way to arrive than in a BMW. And we've only given you here just a very few reasons why all over the world not only aspiring but also technically knowledgeable drivers are increasingly insisting on BMW.

Shouldn't you give the matter a second thought?

You'll find yourself in good company. Drive BMW.

BMW cars.

Other Opinion

Yitzhak] Rabin's assurances that the latter cuts in nuclear weapons to abandon the pre-

advocated dialogue and speaks a language of control deal is now, in theory, up for negotia-reason while exposed to threats from Libya's tion and President Reagan cannot hope to

Colonel Quadhafi. How are we to call on mod- dodge the issues raised by the Russian propos-

erate Arabs to make themselves heard when als when he meets Mr. Gorbachev.

Again, violence intrudes upon peacemaking in the Middle East. A mainstream Palestine breathing down its neck, Jordan has a good Liberation Organization group claimed responsibility for murdering three Israelis in Cyprus, and, citing that deed, Israel has conducted air attacks on PLO headquarters in distant Tunis. The preliminary American judg-ment was, unexceptionably, that the air strike was a legitimate act of self-defense. But the strike is also bound to burden even more an effort at reaching peace that was already hav-ing difficulty getting under way. The Cyprus killings had made it marginally

harder for Israel to stay the diplomatic course. The Tunis attack may weaken Yasser Arafat's work-with-Jordan wing of the PLO and leave King Hussein - embarrassed even as he visited Washington - without the Palestinian partner he needs to step ahead. This would hurt, King Hussein, dragging part of the PLO uncertainly behind him, has just endorsed "prompt and direct" negotiations with Israel. These previously unspoken words were taken in some quarters merely as an exercise he had to go through to help the Reagan administration withstand the Israel lobby's opposition to a new American arms sale to Jordan. But, in the Middle East, such words are important; people may live and die by them.

Despite the violence, the Jordanian arms package remains on the congressional agenda. Advocates of the sale have to press the Israelis and their congressional allies to grasp the strong American interest in the political health of King Hussein. They must press the king to

judgment of South Africa's president, Pieter W. Botha. All year, with the storms of protest

raging around him, he has been elaborating a

blueprint for "reforming" the racist structure of apartheid. From afar he often seemed to be

improvising, now soothing his nation's blacks.

now rebuffing them, as if to stifle rebellion

with ambiguity. But now that he has laid out

his "manifesto for a new South Africa," only

his foreign interpreters sound confused. For a

man in his circumstance, he has been remark-

Mr. Botha is a semantic trickster. In one

sentence he embraces "a united South Africa,

one citizenship and a universal franchise." In

the next, that becomes a South Africa of

"units," with at least three categories of citi-

zenship and a franchise that keeps voters a universe apart. In one breath, he describes

black South Africans as a welter of distinctive

"cultures." In the next, he calls them a single

coherent. It is also pathetic.

group that threatens to dominate the whites.

ably blunt, consistent and purposeful.

military case for needing a new arms pipeline and a good political case for needing the visi-

ble mantle of American patronage.

When the king offered "prompt and direct" negotiations, the prime minister of Israel saluted his "vision of peace" and the opposition deputy prime minister dismissed his "ver-biage." They joined in rejecting the Hussein demands that negotiations 1) take place in a United Nations forum including Moscow and 2) include the PLO.

But Israel should not want to leave an impression that, while the king is moving, it is digging in. On the new arms package, the Israelis worry lest a rearmed Jordan join another Arab war against Israel. They might better worry that a Jordan frustrated in Washington may turn to another supplier, as Saudi Arabia has just turned to Britain, for arms on which there are no American controls.

Here a firm American attitude is essential. But the Reagan administration's effort to compose a Jordanian-Palestinian delegation to negotiate with Israel is wobbling. No political decision is yet evident to invest the high-level prestige and energy necessary to advance a peace initiative and to cope with the regional turbulence it will surely generate. The admin-istration's notion of linking arms sales and peace moves is sound, but the process has to be handled with care and — as the latest violence has shown - with all deliberate speed.

- THE WASHINGTON POST.

The "homelands," four of which are labeled

independent, could each become one or more

"units" in Mr. Botha's reunited South Africa.

So would the walled-off black townships.

Blacks would participate in political "struc-

tures" on a unit basis, managing "their own" affairs, such as segregated education and hous-

ing, and having "a say at higher levels."

Even at higher levels, there could be no

black chamber of Parliament alongside the

new Asian and mixed-race chambers advising the white one. But a few blacks might be admitted to the still-more-advisory President's

Council, to offer "inquiries and proposals."

That is the Botha reform, unaltered by any

of his moods over the year. Black leaders who

accept it might be consulted, but never those

guided from "abroad" by the exiled leaders of

banned black power organizations.

No less devious than the apartheid of

"homelands," Mr. Botha's scheme is even

more explicit in its racism. And it is even more

plainly designed to let whites divide and domi-

nate blacks, without yielding any power or privilege. All this in the same week that South

Africa's white business leaders publicly urged

negotiation with acknowledged black leaders

"about power sharing." full citizenship "to all

our peoples" and restoration of the rule of law.

balmed." President Botha remains, sly and

Playing the Nuclear Numbers

By James Reston

WASHINGTON — The Soviet Union's latest bid in W the nuclear numbers game is better than no bid at all, but not much better. It keeps the propaganda game going, but it is an opener and not a winner.

Moscow proposed a 50-percent cut in U.S. and Soviet nuclear weapons and presented it at Geneva as an insur-

'How's this? You take a counterespionage boss and

two minor-league spies in exchange for a top

KGB agent and a mole to be named later.

ance policy for the world. But as all policyholders know, it

is important to read the fine print.

Fifty percent of what weapons? Not all nuclear weapons, it appears; not the Soviet medium-range weapons targeted on every North Atlantic Treaty Organization capital, but the U.S. medium-range, land-, sea- and airlaunched missiles targeted on the Soviet Union.

Larry Speakes, the White House spokesman, gave the proposal a medium-hello; for once he was certainly right.

The Soviet proposition is something like this: Both Washington and Moscow have large numbers of intercontinental nuclear weapons that could hit one another. Let us cut them in half.

But first: You must also destroy half your mediumrange missiles that could hit the Soviet Union.

And second: We will keep our medium-range missiles, since they cannot reach the United States (only Europe and the U.S. troops there where they have no right to be).

As I understand it, Moscow would agree to "concede" these points only on the understanding that the United States would promise not to test or deploy defensive veapons in outer space.

In effect, this is a proposal to play tennis with the net down when Mikhail Gorbachev is serving and to raise it when President Reagan is serving. Not surprisingly, Mr.

Reagan did not think this was a very good deal.

So the numbers game goes on. Mr. Gorbachev will discover in his meetings this week with President François Mitterrand that his 50-50 proposal, leaving all those SS-20s aimed at the Arc de Triomphe or even at such nuisances as Le Monde, will not play in Paris.

The Reagan administration was very smart about this. it recognized that Moscow's 50-50 proposal made more news than sense, and fixed up a little Western presummit

meeting with the European leaders, who would have more to lose by such a deal than anybody else. No doubt they will have something to say before Mr. Reagan and Mr. Gorbachev meet next month in Geneva.

And speaking of Geneva, it should be no surprise to the president that Moscow has come forward with what it calls an insurance policy for the peace of the world. In February 1932, one of the first of the Soviet ambassadors, Maxim Litvinov, made the first really startling Soviet proposal for world disarmament. He made Mr. Gorbachev sound like a piker.
"The Soviet Union," Mr. Litvinov said, "requires nei-

ther the increase of territory, nor the interference in the affairs of other nations to achieve its aim, and could therefore do without army, navy, military aviation and all other forms of armed forces."

He then dared the nations in the Geneva Palace of Peace to match this glorious vision. But they went out to lunch around the rim of the lake, and the Russians have blamed America at disarmament conferences ever since. Still, something hopeful is afoot. Everybody is talking nonsense, as usual, but a lot of people are beginning to look at facts on the side.

In Moscow, for example, Mr. Gorbachev has come out against booze — a daring experiment in that country,

empire" and refused to compromise with "reckless Democratic spenders," is sitting down with both, and the Russians are talking to the wicked capitalists in Washington, whom they once said they would ignore.

But it is not too bad. If it were any better we wouldn't believe it, and if it were any worse we couldn't stand it.

By Owen Harries

WASHINGTON — Interest in the sinking of the Greenpeace ship in New Zealand has focused on of a fishing agreement with another microstate, Kiribati, and more such agreements may follow. Moscow. the tragicomedy in Paris. But it also highlights the fact that in a remark-ably short period, the southwest Pa-cific has been transformed from Havana and Tripoli clearly see these small and vulnerable island states as about the most tranquil region on

targets of opportunity.

There is a striking degree of irratio-Earth to one of the most turbulent. The ANZUS alliance is in disarray There is a striking degree of irrationality in what is happening in the region. New Zealand continues to insist that it is a loyal member of ANZUS, but it has managed in the course of a year to destabilize what had been the most stable of relationships. New Zealand and the island states rank among the world's most unlikely proclear targets, yet they have over visits by nuclear-powered or nu-clear-armed U.S. ships to New Zealand. Large sections of the governing Australian and New Zealand Labor parties favor withdrawal from the aliance, and nonalignment. Thirteen countries in the region recently signed a treaty to make the South Pacific a nuclear-free zone, declaring their opposition to the acquisition, unlikely nuclear targets, yet they have spawned unusually strong anti-nuclear movements and made the issue the stationing and testing of nuclear weapons. Moscow, realizing that the treaty serves only to limit Western centerpiece of their foreign policies.
All this does not mean that the region faces imminent catastrophe. It

options, promptly welcomed it.
The French department of New does mean that the trends are generally bad and that the United States Caledonia is the scene of unrest and should be doing something about them, especially as the situation to the northwest, in the Philippines, is violence; a recent election there showed that its population remains deeply divided over the question of independence. Members of one of the deteriorating even more seriously.

There are several problems to be faced. French nuclear testing in the parties involved have been to Libya for advice and instruction. Cuba is taking an interest in the new micro-

area requires that a balance be struck between U.S. regional interests and its relations with a major ally. Silence state of Vanuatu, sponsoring its admission to the nonaligned movement.

The Soviet Union, hitherto successfully excluded from the region, has gained a toehold there in the form

and noninterference are the best

Trouble in the Southwest Pacific ability of the small island states also demands attention. The most impor-tant step Washington can take is to curb the predatory activities of the American Tuna Boat Association members, who plunder the migratory species of the region. For many of the islands, these fish constitute their

only significant economic resource. The gravest component of the de-terioration is the spread — beyond the usual leftist circles into the Australian and New Zealand govern-ments and the population at large of quasi-neutralist and pacifist sentiments. These sentiments, wrapped in the language of perceived threats, ig-nore the costs involved and the real

threats facing the region.

The basic U.S. concern should be to encourage the reality principle in the thinking of the region. It should be made absolutely clear that the neutralist courses now being followed and contemplated will carry substantial costs in future relations with the United States. This would be better "alliance management" than the flaccid compromising often implied by that term. It would also strengthen the hand of those — still the majority — who support friend-ship and alliance with America.

The writer is co-editor, with Robert W. Tucker, of The National Interest, a new foreign policy magazine. He con-tributed this to The New York Times.

How Not to Use the Bomb: A Hot Topic at Los Alamos

By Flora Lewis

LOS ALAMOS, New Mexico — The Russians' new arms-control proposal, delivered Monday in Geneva, represents the first time they have offered substantial reductions and not just ceilings on existing arsenals. At last, there will be a start on real

It is a shrewd move by the Soviet leader, Mikhail Gorbachev, another sign that Washington can no longer rely on Soviet intransigence as an excuse to avoid making its own tough arms-control decisions. There is no evidence as yet that the United States has definitely faced up to these decisions. The battle on the Potomac is likely to rage even more furiously before it is settled.

Nobody has a more immediate stake in the outcome than the scientists here at Los Alamos. Most of the United States's nuclear weapons, starting with the first atom bomb, were designed on this isolated desert mesa. Many of the key approaches to strategic missile defense are being investigated here, and were for a decade before they were packaged by: President Reagan into the concept known as "star wars."

The reflections of the people who have given us the weaponry are in-

structive now. Louis Rosen is a physicist who first came to Los Alamos as a member of

and the MIRV capability brought the

United States and the Soviet Union

to a fork in the road. In the end,

Richard Nixon and Leonid Brezhnev

decided to limit anti-ballistic missiles

Secretary of State Dean Rusk, pre-

occupied with Vietnam, had said the

decision on proceeding with multi-

ple-warhead missiles should be left to

the Pentagon. He and others involved in the decision now say they made a

mistake and that single warhead mis-

siles provide greater stability.

bate that is still in progress.

So the fifth phase opened in 1979

retaliation in kind would mean.

Both superpowers, meanwhile,

raced to devise the atom bomb before Hitler's Germany could do it. He is a slight, chipper 67-year-old, revered for his scientific eminence and his sweet temper, and he is certainly a man who believes in a strong defense for the United States.

But looking back, he says his first wish for Los Alamos now is not about

Expecting science to provide the answers is a way of saying, 'Let George do it.'

how to build newer and better arms. "Los Alamos has contributed magnificently to basic research, useful in industry and medicine as well as deterrence," he says. "Now we should add a large center to study strategies for avoiding international conflict, looking at arms control, verification,

strategic defense and so on." He adds that "such a center would have enormous credibility, because this lab knows about the dangers, the risks, the opportunities, what may be feasible."

Separately, Donald Kerr, who has been director of the lab for six years, sounded the same theme on his last day before moving east to a new post. "Technology has advanced," he said, talking about the work of Los Alamos in the last generation. "But

the issues are the same as in the late 1960s: missile defense and modernization of strategic forces. The level The Anti-Ballistic Missile treaty: of understanding of Congress and the political leadership is no greater than was 20 years ago.
"What is missing is a view of the

role the U.S. should play on the world stage, how our economic, political but to proceed to develop their MIRVs. in fact, they never seriously discussed abandoning them. [and] military life, which support our national posture, are to be woven together. We act as though military planning, arms control, trade were each an end in itself.

"We don't deal with the fundamental issues that cause us to deploy these arms, which require an integrated view. We address technology problems, like cruise missiles. But we don't ask why they are there at all. That's frustrating.

Mr. Kerr, who is 46, quoted Churchill's remark that "the next stone age may come on the silver wings of sci-ence." That, he said, "should be a strong motivation to solve some of those issues."
"What I've learned," he said, "is

that the issues which are really at the core of this confrontation aren't amenable to technical fixes." These are the kind of men Mr.

Reagan is talking about when he asks

American scientists to find a way to make nuclear weapons "impotent and obsolete." They have tremen-dous confidence, based on achievement, about the ability to solve purely scientific problems. But they are neither ashamed nor afraid to remind us of the limits of physical science. Expecting science, and billions of dollars spent on fabrilous experiments, to provide the answers is a way of saying, "Let George do it." Science isn't George. The advice of these scientists on what is lacking, as well as on what can be done with their inventions and discoveries, is worth presidential attention. It should embolden Mr. Reagan to think beyond high-tech solutions as he decides how to answer Moscow.

LETTERS TO THE EDITOR

The People of the Adige

Your report, "Sinowatz Presses Craxi on Alto Adige" (World Briefs, Sept. 14), was misleading.

Alto Adige has a mixed popula-tion. The cities in the valley of the Adige are inhabited mostly by Italians; the mountain villagers are mostly of Austrian origin. You cannot

years ago. But honesty forces me to
admit that he is right in his analysis of ly of Austrian origin. You cannot therefore say that the territory has a

German-speaking population, as if all its people were Germans. And there is no question of "raising" German to the same level as

alian. A constitutional law establishes that the region is completely bilingual (schools, courts, public documents and so forth).

OSLO—The nuclear powers have come to a strange pass. Unable to agree to get rid of the nuclear weapons they have scattered about the globe, they are now debating the wisdom of trying to erect a defensive shield. If it were not a potential trage-dy, one would think it a joke.

How did we get ourselves into this mess? How did we manage to move in 40 years from a world with a single nuclear weapon to one with 50,000? It does no good to hurl accusations in one direction only; there is blame enough to go around. This becomes clear if one examines the phases the world has passed through on the road

to today's huge nuclear stockpiles. The first phase, as we have been reminded recently, opened in 1945 when a mushroom cloud rose over Hiroshima. In the United States and Europe, news of the attack was welcomed as a sign that a terrible war was nearing an end. Those of us who were set to take part in the invasion of Japan breathed a sigh of relief.

Yet the global turmoil left by two world wars has continued. While avoiding the worst, the world has experienced a series of lesser wars. Meanwhile, a whole new arms industry has grown up to produce nu-clear weapons. The military has devoted much attention to developing

members signed up in just the first few weeks, booking more than 17,000 bed-

The Guest Club is just one of several new marketing initiatives undertaken by LHW, which is intent on making the world's travel agents just as aware of it as they are of other hotel names like Sheraton, Hilton, Westin and Inter-Continental.

LHW has a global electronic reservation system as well. There are 100 people in New York responding immediately to phone reservations, punching the data into IBM computers which are linked by space satellite, guaranteeing confirmation within 24 hours. Last year our system handled more than 500,000 bookings for well over a million bed-nights, and the totals are climb-

ciding which new hotels we will admit into LHW, and then, sadly, which few hotels may have to be asked to leave. Sometimes ownership changes and a hotel's standards slip. Sometimes a hotel's owners just don't have the finances to conduct the always expensive upkeep we demand. We have a ream of LHW hoteliers constantly on the road, inspecting, evaluating, reporting. It takes an approval vote of at least 75 percent of the current members before a new hotel is admitted, and I can assure you there's no tougher jury in the world. We have just over 200 hotels now and our maximum

To make the point that the Swiss winter sun is warming, LHW chairman Ernst Scherz sets up his office on the ice rink outside the Gstaad Palace Hotel.

"Our Great Affordables brochure has story-high attium lobby is the organizaworld's most prestigious and elegant hotels. Many customers and agents are under the Sea in Israel, LHW's newest affiliate is the misraken impression that these quality ho- Daniel Hotel and Spa, a health-and-beauty tels never offer a package price. The truth is: we have to meet the competition and, like other hotel groups, we are eager to bolster weekend occupancy when our business: traveler clientele has gone home. Great Affordables opens the doors of some of the world's top hotels to guests eager for a bit of a bargain."

If you haven't heard of Leading Hotels of the World before, you can be excused. Although it was founded in 1928, the group has kept a low profile for much of its life. Only since 1973, when Scherz became chairman of the group, has it begun to develop its commercial muscle.

"Unlike the big hotel chains," he observes, "LHW is not a single firm with one management, a single global image, a stan-dardized horel logo and a fixed way of doing business.

Quire the opposite. We're an affiliation of about 200 of the best hotels in the world, the vast majority individually-owned, some family-owned, each usually possessing the reputation of being the top hotel in its community. The Crillon in Paris, for instance. The Plaza in New York. The Palace in Gstzad. The Savoy in London, the Vier Jahretzeitsin in Hamburg, the Peninsula in Hong Kong, the Oriental in Bangkok, the Taj Mahal in Bombay.

These hotels are tops. But when the big multinational hotel chains began to mature after World War II, it became apparent that these fine deluxe hotels were being out-markered. They could no longer afford to sit back and rest on their reputations. They were losing out in the marketplace because travel agents found it easier to book clients into chain hotels with their electronic reservations systems, instant confirmations, competitive rates and global advertising to presell the client on the agent's selection of hotel.

been another best-seller," Scherz notes. "In tion's first footbold in China In Dublin. it we've listed some excellent reduced-price: the Westbury Hotel-150 rooms and six weekend package offers from some of the suites-has been admitted, to join its Dublin sister hotel, the Berkeley. On the Dead

slipped into each bedroom in the gleaming 470-room Sheraton Grande Hotel on Los Angeles' South Figueroa Street to turn did it. down the beds and place liqueur chocolates

their rooms?

There's no mystery about it. The butler

"As far as I know, we're one of the very on every pillow? Who knocked on the door few hotels in the world to have an Englishat an appointed time with hor coffee and style butler service on every floor," explains the morning paper? Who handled jiffy Joseph Giudice, the spokesman. "The idea suit-pressing and shoe-shining, and ordered came to us literally during a pre-opening up appropriate food and drink for those staff brainstorming session. We were

unique services for the business travelers who make up the bulk of our trade, and idea: butlers. The more we thought about

it, the better the idea looked." The butlers, alas, are not all British Jeeveses, most having been recruited localof a P.G. Wodehouse novel, each clad in a (213) 617-1133.

starched-front white shirt, morning suit, pinstripe trousers and the inevitable white gloves. The hotel claims to have more than a half-million dollars invested in butler uniforms and supplies for the butlers' pantries on each floor, stocked so that no matter what time the butlers are summoned, and no matter what the request, they'll be able to satisfy the guest's demand.

Part Two of a two-part section.

"It's sort of like having your own Hudson, right out of 'Upstairs, Downstairs,' says an awed guest, newly converted to the joys of on-call butler service. A major Grande Hotel difference, of course, is communications. Guests don't tug at velvet bellpulls when they want service, and the butlers aren't congregated down in the servants' hall belowstairs. As a Sheraton butler explains: "You merely dial two numbers on your room phone. That sets off the portable Cobra phone I have on my person. I'm with you shortly thereafter, because you've been able to contact me directly, avoiding having to go through the hotel operator." Old World service, in other words, by way of New World technology.

Hotel guests meet the duty butler just after they've checked in. The bellboy makes a point of stopping at his desk, in front of the elevators, to make introductions. The role of the butler is quickly explained to the guests, who may be a bit confused as to where the hotel butler's turf ends and the hotel concierge's territory begins.

The chief concierge at the Sheraton Grande is Brian Wieder, 2 member of the prestigious Clef d'Or, and he explains: The butler takes care of all the guests' needs in-house. Unpacking, if you want that service. Refrigerating special medicines you might be carrying, or even special foods. Corking your own wine if you're planning to entertain several nights in a row. Picking up and delivering your laun-

dry.
"At the concierge's desk, we're on call
24 hours, to handle guests' requests for help outside the hotel: confirming plane reservations, arranging theater tickets, ordering up limousines and taxis, giving vhere to shop and what to

Sheraton's butler service is available to all guests, not just those in the VIP suites. someone on the staff came up with the "Our butlers are yours, whether you're in one of our \$135-a-night standard rooms or our \$550-a-night suites," Giudice explains.

If you'd like a butler at your service the next time you're in Los Angeles, the Sheraly. But they look as if they have stepped out ton Grande's telephone number is:

Fragrance Wins by a Nose

hastening to catch a departing jetliner and pausing for as short a time as possible to constitutes the subtle intricacies of a perfurne or cologne. For most of us, it's a quick Smells nice ... How much? ... I'll take soap. it," and we're on our way.

For the average male business traveler, complex and many-layered language as he passes his nose slowly over a scent-retaining test stripe for the hundredth time of the pick up some duty-free fragrances, there's day, attempting to blend ingredients in little or no basic comprehension of what such a way as to create the new scents that will be the ballmarks of comorrow's new brands of perfume, cologne, after-shave and

Martin Schimmelpfennig, export man-But to the few gifted individuals who ager of Maurer & Wirtz, tries to demystify guide the fortunes of the world's leading the top-secret work going on in the fragrance houses, it's not so simple. The M & W laboratories as technicians pains "perfumer" in a major fragrance house like takingly sort over hundreds of bottles of character. Maurer & Wirz, located in Stolberg in the varied essences in search of tomorrow's rolling German hills near Aachen, speaks a market leader. "We're out to keep ahead of

the competition by a nose," he smiles. bac Original," he explains, "the experts look for three distinct characteristics. First, there's what we call in the fragrance busi-

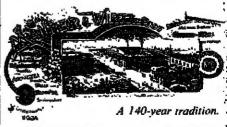

distinctive calling card, the first impression it makes on you. Then we have something a little more subtle. It's the middle note-what they call

in the business the modifier. This is what gives the fragrance its harmony and its

"And finally there's the end note. This is "In a fragrance like our best-selling Ta- the odor which is most persistent and which gives the perfume its personality."

This family firm, still headed by a trio of Wirtz males, began in 1845 when Michael ness the top note. That's the perfume's Maurer and his stepson Andreas Wirtz decided to manufacture soaps of French, English and German recipes, branching out from the small retailing business they were operating in northwestern Germany. For almost the first 50 years, the company's soap-boiling plant bubbled away in the backyard behind the family home.

Today the company produces more than 1,000 different brands of fragrance, toiletry and grooming products, and they're sold in more than 130 countries. The backyard business has become a global giant.

Tabac Original became part of the firm's family of products in 1938, when M & W absorbed the Austrian firm of Riva, which produced a luxury soap called Tabak. The brand name was gallicized, and today Tabac Original's distinctive white bottle is one of the most familiar products being passed

Schimmelpfennig reverts to the perfumers' language to try to describe the Tabac Original fragrance. "The first impression is a high point of unexpected and refreshing citrus. You can smell that immediately, can't you?

across dury-free counters around the world.

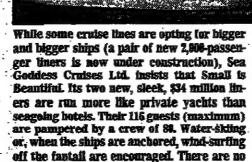

"Now inhale again. Can't you feel it mellowing? Do you smell the field flowers that are there too? The warm woods and subtle spices? The bergamot and petit

The result, say Tabac Original's marketers, is a fragrance that's clean and contemporary, light yet lingering. "It's right for today," Schimmelpfennig insists, "right for tonight as well. It goes with everything, from denim to cashmere."

The Chinese are earnestly trying to make sure Western tourists feel at home when they arrive, up to and including labeling essential amenities in English. Alas, however. sometimes important messages are garbled in the translation. For instance, one ladies' lavatory was recently helpfully labeled "WC." And the men's lavatory alongside?

For bargain botel rates, it's tough to beat Cathay Pacific's Stay-a-While package deals. Most of their deals in 24 cities along their routes involve full breakfast and airport transfers. Some sample prices: \$21 per night at the Airport Travelodge in Auckland, \$51 per night at the plush Plaza Hotel in Seoul. Your travel agent or the nearest Cathay Pacific ticket office has a supply of the Stay-a-While brochures.

first and second seatings; you eat when you

want and sit with whomever you choose. The two-year-old luxnry cruise company deploys its ships in the Mediterranean in the summer and in the Caribbean and off South America

Hotel is the center

of village social life

holiday-makers and cameraclicking sightseers, all eager to sample just a bit of the high life in the Oberland village some say is the most exclusive winter

"I think Gstaad's secret," says 46-year-old Ernst Scherz, whose family has run the Gstaad Palace for two generations, "is that it is still a small Swiss village, unchanged, unspoiled, even if the rich and the beautiful have made our town their winter holiday home.

We have only 1,000 hotel beds in this village, which is not a lot. We could pack thousands more guests in here if we were willing to turn the developers loose and let them put up hotels, chalets and guest houses willy-nilly. That's what happened in Saint Moritz, where they now have a couple of Club Meds and 14,000 beds. And Zermatt, with its 12,000 beds. They're holiday factories. No. our village fathers insist on keeping things just the way they've always been. We improve, but we don't grow, That's the secret."

What also doesn't change is the near-total dominance of Scherz's Gstaad Palace Hotel over the entire Gstaad winter whirl. It looms up over the village sprawled at its feet like a noble overlooking the ranks of the yeomen he commands. Its 150 rooms and apartments are reserved each winter by some of the world's most powerful peo-

72-year-old property which his father bought in 1947. "He had managed it for years, and when the owners decided to sell it, he had to come up with the cash in just 24 hours. But he managed to buy control, and we've never looked back since. We're one of the few hotels in the world with more staff - 280 - than guests -- 220. We close twice a year for three months each time; in short we're only open half the time. We completely redo this hotel twice a year; it has a summer configuration and a completely different arrangement of facilities in the winter. We take in 5 percent of one 24-hour period: New Year's Eve. Another 30 percent

comes from just one month. February, I don't think there's another hotel in the world quite

Staying in the Gstaad Palace is like staying in a marvelouslyequipped, lavishly-staffed Swiss country home. The accent is on informal luxury. The rooms aren't large, but they have every possible comfort; heated towel mcks, nine channels of television, arrays of soaps and lotions, fluffy after-bath robes, marbled

bathrooms and flowers, flowers. flowers everywhere.

On the lower floors the hotel boasts the arhletic facilities of a miniature Olympic village. There's an ice rink, of course, for skating and curling. A heared indoor swimming pool. Weight and exercise space for the physical-fitness buffs eager to pump iron, hang from their heels or tackle the Nautilus machine. And if one's idea of

the Palace has plenty of dance-

In the summer Niki Pilic and Roy Emerson arrive to conduct tennis weeks at the Palace. Prices for the week start as low as 2,050 Swiss francs, covering room, demi-pension and five hours of instruction per day.

"The relaxing thing about Gsraad is that you can come back year after year and not much seems to have changed," Scherz continues. "But things

are changing all the time. I'm working now with several of the other hotels in town to persuade them to upgrade their facilities, to offer more quality in their accomodations. The more first-class rooms we can put into the existing hotels, the better for Gstaad's image." The Palace has done its bit to upgrade available accomodations

by building a 21-aparement cha-

let adjacent to the hotel; 20 of

the apartments have already

been snapped up, mostly by buyers from abroad. And so Gstand and its Palace begin yet another festive season. Places. everyone. Curtain going up.

bome plate. The resident Cardinals

The residen on second and third and one out in But about the opener of the the seventh-ruining the best New

York rally of the night.

The conventional wisdom was whereas the Cardinals could enter the series relaxed. By altering his pitching rotation, New York Man-ager Dave Johnson altered that Johnson worked it so that Goo-

den would pitch Wednesday. Most managers would have opened with the 23-4 superstar, but Johnson de-cided on a novel twist to a pennantrace mind game; He started Dar-

race mmd game; He started Darling (16-5) against Tudor (20-8).
"This is a big game for the Cardinals," Johnson said with intentional irony. "If we beat Tudor, who's been their best pitcher, then we'll have Gooden with extra rest against Andujar with short rest [three days], in the second game, "If we win that," said Johnson, raising his eyebrows, "then you know everybody will forget that the

Cards have won 98 games and start

From the start, Tuesday's game was a masterful pitchers' duel. "Darling pitched the game of his lifetime. To me, he was the hero of this game," said Keith Hernandez.

Darling walked the first man he faced, yet through five innings he gave up only two hits and allowed two men to reach second base. Twice he retired Tommy Herr (he of the 108 runs batted in) with men on second in the first and third

Tudor, who already had pitched 10 shutouts this year and four since Sept. I, began even more impressively. Through four innings he permitted only a walk to Hernandez, a soft line single to right by Ray Knight and a long fly out to left by Hernandez.

New York's big chance to break through came in the seventh. Knight sliced a single to right and Rafael Santana lashed a liner off Tudor's left ankle, the ball caroming down the rightfield line to the Cardinal bullpen for a double. With men at second and third

and one out, and with Tudor's ankle throbbing, Johnson let Darling hit. Or, rather, bunt. The squeeze was indeed suicidal: Darling bunted through a 1-0 curve, and Howard Johnson, running for Knight, was dead at home by 40 feet.

Pitching continued to keep all doors shut tight until Strawberry's rocket. Ironically, Dayley had started the 11th by striking out

Agreement Reached on Sale of Pirates

PTTTSBURGH (AP) — A group of public and private investors, committed to keeping the Pirates in Pittsburgh, reached agreement in principal on Wednesday to buy the National League team from the Galbreath family and Warner Communications Inc. The team will be sold for \$22 million in cash plus the assumption of certain player salaries. The deal is subject to the approval of major league baseball owners.

The Pirates identified the buyers as a coalition represented by Mayor

Richard S. Caliguiri; Douglas D. Danforth, chairman of Westinghouse Electric Corp.; Carl F. Barger, a Pittsburgh attorney, and Malcolm M.

Prine, chairman of Ryan Homes Inc. Pittsburgh, last in the Eastern Division standings in 1984 and 1985, has failed to draw a million fans since the 1983 season. It has lost 101 games this season — the most by a Pirate team in more than 30 years — and will lose a reported \$9 million. The team reportedly lost \$6 million in 1984.

NFL Bills Dismiss Coach Stephenson

ORCHARD PARK, New York (AP) - Coach Kay Stephenson. whose Buffalo Bills won only two games in 1984 and are winless so far this year, was fired Tuesday. The National Football League club named defensive coordinator Hank Bullough to replace him.

Stephenson, 41, had been the Bills' offensive coordinator until 1983, when he succeeded Coach Chuck Knox, who took the head job at Seattle. Stephenson's first team went 8-8; the Bills were 2-14 last year.

Bullough, the defensive coach and linebacker coach with Cincinnati from 1981 to 1983, joined the Bills in January after a brief stint as coach of the now-defunct Pittsburgh Maulers of the United States Football League. He has coached in the pro ranks since 1970.

Cocaine Dealer Gets 12-Year Sentence

PITTSBURGH (AP) - Shelby Greer, accused of accompanying the Pittsburgh Pirates on road trips in order to supply some players with cocaine, pleaded guilty late Tuesday to seven federal drug distribution charges and was given a 12-year prison term. Greer, 29, of Philadelphia, admitted selling cocaine to at least four former Pirates from 1981 to 1984.

Greer was one of seven men indicted by a federal grand jury May 31 on cocaine trafficking charges following a lengthy investigation into drug use by major league players. He is the sixth to have his case resolved. Four have pleaded guilty and two were found guilty; the trial of the seventh man, Jeffrey Mosco of Pittsburgh, is expected to resume this week.

Pizzolato in the '84 New York race, when 'ciao' meant hello.

Thai Cultural Dating Revised After Kiln Finds

United Press International BAN KO NOI, Thailand - After taking a second look at 1,000-year-old kilns in Ban Ko Noi, 280 miles (450 kilometers) north of Bangkok, that had been partially excavated, a Thai-Australian team lenging the belief that Chinese potters developed the Thai ceramics industry during the 13th-century

Sukhothai period. "This was the cradle of an independent Thai civilization as far back as the 10th century" said an Australian archaeologist, Don

IN BRIEF

U. S. Tropical Disease Research Lags

WASHINGTON (NYT) - The probability that researchers will be able to develop successful measures to control tropical diseases "has never been greater than it is today," according to a report issued by the Congressional Office of Technology Assessment. But the federal government is spending less than \$100 million a year on tropical disease research, a tiny fraction of its total annual biomedical research budget of well over \$1 km² in the federal government.

well over \$4 billion, the congressional agency estimates.

Researchers have already contributed a few important treatments for researchers have already contributed a few important treatments for iropical diseases; oral rehydration therapy to prevent death from a wide spectrum of diarrheal diseases; praziquantel, a drug marketed in 1980 to treat schistosomiasis, a debilitating disease caused by worms; and ribations varia, an anti-viral drug that has proved effective against lassa fever.
Scientists using recent advances in biotechnology hope to have a vaccine capainst malaria on the market in 5 to 10 years.

But research on therapies for tropical diseases has lagged behind research on diseases of importance to the United States, which offer a bigger market for drug companies, the report said. "Few new drugs have been introduced for human tropical diseases in the past two decades," the report noted, but there has been a surge in development in drugs to combat parasitic infections in domestic animals.

Effects of Eye Operation Questioned

SAN FRANCISCO (UPI) - Radial keratotomy, an operation used 50 far on more than 100,000 people to correct nearsightedness, may have serious drawbacks, according to the head of a research team conducting a five-year study of the procedure.

Speaking at the annual meeting of the American Academy of Ophthal-mology, Dr. George Waring, ophthalmology professor at Emory Univer-sity in Atlanta, said one-third of the 435 patients examined during the second year of the study had suffered visual fluctuations long after their eyes were expected to heal from the operation. A diamond-tipped knife is

used to slice into the comea. Also at the meeting, Dr. Arthur Ginsburg, founder and director of the Air Force Aviation Vision Laboratory at Wright-Patterson Air Force Base in Ohio, demonstrated a new system of determining visual ability. As well as measuring visual acuity more accurately than the standard Snellen chart, the Vision Contrast Test System shows a person's ability to see under different light conditions, such as dusk or bright sunlight. Dr. Ginsburg said it can provide doctors with early information on such

conditions as lazy eye, cataracts, glancoma and multiple scierosis. Instead of using the progressively smaller black letters against a white background, the new chart utilizes a computer-composed series of circles with bars of different widths and contrasts. The bars are vertical or slaut to the right or left.

Research Park on Bering Sea Urged

WASHINGTON (UPI) - In an effort to advance arctic research and help thaw diplomanc relations, Walter Orr Roberts, a noted U.S. atmospheric scientist, has suggested that the Soviet Union and the United States create a research park on both sides of the Bering Sea.

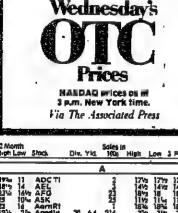

In an article in Journal '85, a publication of the World Resources Institute, he proposes that the research park include about 50 miles (80 kilometers) of the easternmost tip of Siberia, 50 miles of the westernmost tip of Alaska and the 60-mile-wide strait separating the two countries. "Within the zone, cooperative research could be conducted on biological, environmental, anthropological, cultural, atmospheric, oceanographic and other fascinating aspects of this unique region," he said.

Upjohn's New Hair Restorer Output May Make Profit Grow, Too

By EDWARD ROHRBACH

ALAMAZOO, Michigan — Ever since a moonbeam ricocheted off Yul Brynner's royal Siamese pate and twinkled the eye of Deborah Kerr, bald has been beautiful. At least that is Hollywood's version. Here in the Midwest, where Americans cover receding hairlines with baseball caps emblazoned with the names of seed and tractor companies, bald holds the prospect of being big business.

Upjohn, the blue chip pharmaceutical company based in Kalamazoo, is developing a promising hair-restoring product. Already, thousands of men are using versions of the drug via a "gray" prescription market in the United States. It was discov

Analysts are also

complimentary about

ered in the 1970s that an Up-john medication for high blood pressure, Minoxidil, had the side effect of growing

"I was getting a 5 o'clock shadow at 11 o'clock in the fundamental changes morning," was one users' complaint. In some cases in the company. women and children taking

the drug for serious hypertension grew tufts of hair on their

Since 1983, when Upjohn began a 28-location drug test using 2,200 men, no marked side effects have occurred with topical application to the scalp. Results so far indicate that one third experienced satisfactory hair growth. Another third benefited from some growth, or at least enough to retard further loss, while the rest, usually men past 55, have not been helped.

As a stock, Upjohn has nearly doubled in price since late last year and almost tripled from its low in the summer of 1984. Then its price/earnings ratio was the lowest in the drug group. Now it is the highest among the big pharmaceuticals.

"Upjohn has become the single drug stock that is the heartbeat of the stock market," said David Saks, industry analyst for Morgan Olmstead Kennedy & Gardner. "When it's strong, the whole group is strong and when it's weak all the drugs are down."

INOXIDIL has been the big kicker in the stock's volatile surge, but analysts are also very complimentary about

"The basic profitability of Upjohn has substantially improved," said David MacCallum of Hambrecht & Quist, "with the best yet to come."

He also pointed out that the company has a relatively small market capitalization of around 30 million shares outstanding. "so a big hit with one product makes a big difference." Mr. MacCallum puts Upjohn's market value at \$100 a share

even without allowing for the potential of Regaine, which is to be the hair product's trade name, if and when the U.S. government approves it. That could be expected a year or two after formal filing with the Food and Drug Administration, scheduled for He said it is "entirely conceivable" that Regaine treatments

could generate 50 cents a day from each customer. If they number only 3 million of the estimated 25-million-plus bald Americans, that totals \$550 million in annual sales for Upjohn, and would rank the hair restorer No. 3 on the current best-selling drug list, behind Tagament and Zantac, two ulcer medications.

Paine Webber's Ronald Nordmann, an early booster of Upjohn because of Minoxidil, likened Regains to Tagament and what it did for its manufacturer, Smithkline Beckman Corp. The greatest selling drug in history, it powered the stock up tenfold. Last year's sales of Tagament totaled \$850 million.

Bonn Says Declined

2.8% August Fall Follows July Rise

BONN - West German industrial production, seasonally adjusted, fell 2.8 percent in August, according to preliminary figures, after increasing 2.4 percent in July, the Economics Ministry said

The ministry had originally put the July rise at 1.8 percent.

The ministry said one factor in the August fall was the influence of school and works holidays on production, which cannot always be entirely corrected by seasonal ad-

"Indications are that school and works holidays weighed less on production in July than normally," it said. "This probably means he July figures give a too favorable picture, while the August figures do the opposite."

It added, "Given this insufficiency in seasonal adjustments, it is more advisable than ever to judge economic trends over longer peri-ods than just monthly results."

Industrial production for July and August taken together rose 2 percent compared with May and June, it noted. Manufacturing industry output in the two months increased by just

under 2 percent compared with the previous two months. In August alone, output by manufacturers fell 2.5 percent compared with July. All areas of manufacturing industry shared in the two-monthly

sector, where production was un-changed against May and June. Industrial production rose 4.5 percent in July and August com-pared with the like period last year.

rise except for the consumer goods

William S. Woodside, American Can Co.'s chairman and chief executive.

Corporate Chief Tackles Social Ills American Can's Head Calls Work Self-Preservation

By Kenneth N. Gilpin

New York Times Service

NEW YORK — On a recent summery afternoon, William S. Woodside, chairman and chief executive of American Can Co., sat in his West 57th Street office overlooking Central Park here, and spoke with some emotion about matters he considers important.

He did not seem concerned, at that moment, about his company's investment in Ticor Mortgage actions like the Regional Plan (\$30,000 in 1984) insurance Co., which has been caught up in the and the Whitney (\$124,000 that same year). It also crisis surrounding the troubled Equity Programs Investment Corp. Nor was he at his most animated nutrition—for example, a study on hunger that when discussing American Can's dramatic and successful asset-restructuring.

Rather, Mr. Woodside was visibly upset about the death of Westway, the proposed superhighway and waterfront development along Manhattan's West Side, a project that had been abandoned by New York officials earlier that day. He was constitution of transition and untrained youth.

In 1984, the founds 2.7-million budget of the constitution of the consti cerned about a flap over a proposed new wing for the Whitney Museum of American Art. And he was "appalled," as he put it, that a would-be corporate co-sponsor had backed out of a hunger

project.
Like any number of companies. American Can has been drawn into a variety of community mat-ters. But unlike a lot of chief executives, Mr.

Woodside, 63, is intensely involved in those mat-

He is the chairman of the Regional Plan Association, a private group that supported Westway and that makes recommendations on transportation, housing, and recreation for New York, New Jersey, and Connecticut. He is also chairman of the Whitney Museum and president of American Can Co. Foundation. It funds civic and cultural organi-

supports projects on public education, hunger, and nutrition — for example, a study on hunger that Mr. Woodside said "dramatized the impact of what happens to the minds of children whose families fall below the poverty line" - and the problems of transition," such as displaced workers

In 1984, the foundation spent 25 percent of its \$2.7-million budget on projects relating to these themes. Grants this year will amount to \$3.7 million. Mr. Woodside said, of which roughly 33 percent will be directed to these areas.

"He took the foundation from a kind of buckshot approach and got it focused on areas of great concern," said Joseph A. Califano Jr., the former

Factory Orders Up 0.9% in U.S.; **Home Sales Fall**

WASHINGTON - Orders to percent in July. U.S. factories rose a modest 0.9 percent in August as strong demand for autos offset a decline in nondurable goods, the government

reported Wednesday. The Commerce Department said the advance in factory orders came from a strong 2.6-percent rise in orders of durable goods, items expected to last three or more years, which offset a 1.1-percent decline

in orders for soft goods. New orders to factories are closely watched by economists as an indication of industry's need or ability to add jobs and production capacity in coming months.

Wednesday, the Census Bureau said that sales of new houses fell a surprising 5.6 percent in August from July's levels, but remained far Strike Force above the sales rate of a year ago. Housing sales and construction, buoyed by lower home-loan rates, have remained a bright spot in the sluggish U.S. economy. Sales of single-family houses fell

to an annual rate of 705,000 in August after seasonal adjustment, the agency said. Meanwhile, the increase in dura-

ble-goods orders in August stemmed from a big surge in de-mand for automobiles, the Commerce Department said. The transcent in August following a 5.5-percent July decline.

Orders for military equipment, meanwhile, rose 3.9 percent in August following a 14.6-percent decline in July.

The key category of nondefense capital goods rose 3.6 percent in August following a 4.6-percent July decline. This category, which has shown weakness for much of the year, is closely watched for hints it can give on industry plans for expansion of production facilities.

was in the food category, although many other industries showed a setback from the July level, when orders were down a slight 0.1 per-

Shipments rose to \$195.9 billion in August, a 1.1-percent gain and the highest monthly increase since March. The department said total orders rose to a seasonally adjusted \$197.5 billion in August following

Meanwhile, analysts said subsidies." bounced up and down in recent Agriculture.

More important to builders, who plan their new construction largely on the pace of sales, is the fact that sales are running 26.6 percent ahead of the same month last year, analysts said.

Another significant figure in the report shows that only 5.8-months worth of houses remain on the market unsold, a total of 350,000. Only when the backlog of unsold houses rises above the 7-month level do builders begin to worry about over-

apacity in coming months. In another report issued U.S. Sets Up On Trade

WASHINGTON - President Ronald Reagan named a federal strike force Wednesday to uncover unfair trading practices harming U.S. industry and to develop methods of fighting them off.

Mr. Reagan promised in a Sept. 23 trade speech to establish the portation category, which includes interagency group as part of his autos and aircraft, was up 10.6 per-refurbished policy designed to open foreign markets without re-stricting U.S. imports.

He announced creation of the interagency group, patterned after the Justice Department's strike forces on crime, at a cabinet meeting and named Commerce Secretary Malcolm Baldrige to head it.

"This strike force is for real," the White House spokesman, Larry Speakes, quoted Mr. Baldrige as saying. "Free trade will not exist without fairness.

Mr. Speakes said the U.S. trade representative, Clayton K. Yeutter, is examining about 12 cases eligible for retaliation.

In his September speech, Mr. Reagan also announced creation of a \$300-million "war chest" to help struggling American exporters compete in world markets.

In addition to developing a strategy to fight unfair trade, the strike force "will identify barriers to U.S. exports as well as unfair export

Besides Comme

Reaches Pact On Pricing

LONDON - The International Coffee Organization Wednesday established price-stabilization measures for its 1985-86 fiscal year.

which began Tuesday. was 69-to-1, with the United States casting the only negative ballot. Costa Rica, Honduras, India, Indonesia and Peru abstained.

The ICO said that an initial global export quota of 58 million bass of 132 pounds (60 kilograms) each was agreed on for 1985-86, down slightly from a final 1984-85 figure of 58.2 million bags.

The ICO said the mechanism for adjustment in the quota, aimed at keeping the price within the unchanged range of \$1.20 to \$1.40 a pound, allows for special arrangements in the current October-to-

Secondary of U.S.s. S. Kor. wood 887.90 Spoot, pessels 161.25 Terlavas 40.34 Thol both 7 Terkish itra 52.545 UAE dirham 14.55 Venez. holly, 14.55 December quarter. If the 15-day average price, currently just below the \$1.20 "floor," is still below that level in 20 marketing days, the quota will be cut by one million bags. If 15 days later it is still below \$1.20, a further cut of one million bags takes place, with another triggered by a subsequent fall to \$1.15.

Delegates from Brazil, the largest ICO producing member, said that the United States had taken a "tough line" from the start of the conference by insisting that the problem of undershipments be resolved before discussion started on quotas and prices. This "tough line" had been maintained throughout, as witnessed by its vote against the package, the delegates added.

Producers were in favor of "appropriate" action to curb under-shipments, and of penalties in the form of quota cuts on ICO producers that sell coffee more cheaply to non-members than to members of the organization.

"All efforts were made not to leave the United States isolated," said the head of the Brazilian negotiating team, Alberto Leite Barbosa. He said the "compromise result" on a package of measures for the 1985-86 year would "support the stability of prices" and the normal flow of coffee.

Rollinde Prager, the head of the U.S. delegation, called the outcome inadequate. "We are concerned that the outcome may not bode well for the future of the International Coffee Agreement or our participation in it," she said. The United States is the largest consuming member of the ICO. (AFP, AP)

IF YOU CAN TELL US EXACTLY WHAT THESE WILL BE WORTH IN SIX MONTHS TIME,

YOU MAY NOT NEED **OUR OPTIONS.**

Only last year the Chicago Mercantile Exchange launched its options on the Deutschemark and it quickly became the most actively exchange - traded currency option in the world.

And now, with CME's latest options on the British Pound and Swiss Franc, together with an interest rate option on the Eurodollar, corporate treasures, bankers and dealers have even greater flexibility in managing rate uncertainty. Exchange, 27 Throgmorton Street, London, EC2N 2AN.

Corporate treasurers use CME options as "insurance policies" against future rate fluctuations in hedging strategies, tender or takeover situations and as an insulation against translation exposures.

Leading banks, institutions and government dealers use CME options as an essential dealing and arbitrage tool to lay off foreign currency and interest rate risk. The high volume of CME options and the tight pricing

which arises from the link between our options and futures contracts has enabled our customers to benefit from an improved and even more sophisticated service.

DETROIT - General Motors Corp. may build another Saturn auto plant and is considering the sale of imported cars through Saturn dealers, according to the company's chairman, Roger B. Smith Mr. Smith said Tuesday in an

interview with the Detroit Free

Press he wished GM had plant capacity to build upwards of a million Samrn cars. "I think we've got to add a little more," he said. GM plans to produce between 400,000 and 500,000 Saturn small cars starting in 1987-88 in Spring Hill, Tennessee.

The company searched for about six months earlier this year for the first Saturn site, and Mr. Smith said GM continues to update its files on potential U.S. sites. He did not know when a second Saturn site might be selected.

"I think they [Saturn executives] have their plate full right now," he

Mr. Smith said Saturn may explore persuading car lines from GM's overseas subsidiaries, including its operations in Europe and Brazil, to expand the Saturn line and allow dealers to sell a wide range of autos.

To be successful dealers will

need more than just one Saturn car.

In a separate interview with another Detroit newspaper, the News, Mr. Smith said GM may offer public shares of stock in its financial subsidiary, General Motors Acceptance Corp., but probably will not do that with its new Saturn unit. If stock were issued in GMAC—

which Mr. Smith termed only a possibility - it would be the third category of publicly traded stock spun off from the still-existing GM common stock

Hanson Trust Planning To Buy More SCM Stock

WASHINGTON - Hanson Trust PLC, the British conglomerate, said Wednesday that in a filing with the U.S. Securities and Ex-change Commission that it intends to buy more securities of SCM Corp., the U.S. typewriter, food and chemical concern.

The filing follows a decision last

Wednesday by a U.S. appeals court lifting a lower court order that had temporarily barred Hanson from buying additional stock on grounds that it might have launched an illegal tender offer in its Sept. 11 series of private purchases of 3.1 million SCM shares.

Nissan Launches Sports Car With Ceramic Turbo

Agence France-Presse
TOKYO — Nissan Motor Co. of Japan introduced on Wednesday a sports car em-bodying the world's first ceramic turbo-compressor.

Made of fine silicon nitride based ceramic instead of the usual nickel alloy, the turbo's rotor gives the engine a high heat resistance and low inertia rating Nissan said

The car is a version of the Fair Lady model introduced in September 1983. It has the same two-liter engine with six in-line cylinders and 24 valves.

The company said that the low weight of the rotor reduces its inertia by 45 percent, which, combined with a lightweight aluminum impeller, reduces the power needed to accelerate the turbo-compressor. The response time is therefore re-

The silicon nitride chosen for the turbine is a synthetic material of the kind used on largescale integrated circuits, and adapted by Nissan for the new

Pantry Pride Raises Bid for Revlon

NEW YORK - Revion Inc. said Wednesday that it had re-ceived a sweetened takeover offer from Pantry Pride Inc., but said that another company also is inter-

ested in acquiring it. The big cosmetics concern also disclosed that it is considering the possibility of "a complete liquidation" or a leveraged buyout that would take Revion private.

Revion said its directors met for an hour Tuesday night to consider the various proposals. It urged shareholders to "not make any decisions pending further advice from the Revion board."

Another board meeting has not yet been scheduled. Revion said. The various proposals concerning Reviou's future stem from Pantry Pride's recent effort to acquire the company, an effort Revion has been trying to thwart.
Pantry Pride, an operator of su-

permarkets and retail stores that is based in Fort Landerdale, Florida, offered last week to increase its bid for Revion to \$50 a share from \$42 if Revion dropped some of the anti-takeover measures it recently Then, 15 minutes before Rev-

lon's board met Tuesday, Pantry Pride raised its bid to \$53 a share, "conditioned on the Revion board of directors accepting it" at their meeting, Revion said.

Revion has 28.3 million common

value of \$1.5 billion.

Stock Exchange Wednesday, Rev- buyout with Forstmann Little & ພ \$53*5*0. However, Revion said its invest-

ment adviser, Lazard Frères & Co., believed that more than \$53 per share" could be realized from afternative transactions or from an outright liquidation. Revion said one of those propos-als was an offer from "a major

an acquisition of Revion." A Revion spokesman declined

comment beyond the company's ny's management typically is in-

Analysts Call P&G Merger With Richardson a Good Fit

By Steven Greenhouse

New York Times Service CHICAGO - Procter & Gamble's products have taken a beating in the last two years, and the Cincinnati-based giant must be hoping that Richardson-Vicks's Vaporub, and other Vicks brands, will soothe the ache.

While Procter & Gamble Co. is trying to overcome its problems with Crest toothpaste, Pampers juice, analysts praise the company for seizing an opportunity to grow in the personal- and health-care

market P&G announced Tuesday that it

health-care products, such as Ivory and Camay soap, Sure deodorant, ously eroded Pampers' market Head & Shoulders shampoo and share and P&G has tushed to rede-Pepto-Bismol, with Richardson-Vicks's team, which includes Vidal

*Richardson-Vicks fits in beauproducts, which they have been orange juice aren't doing stellar eiselling for decades," Robert W. ther." brand names, and who is better at million the year before.

Investment analysts predicted new products.

that P&G, which had revenue of \$13.55 billion in its most recent fiscal year, would squeeze even higher margins out of Richardson-Vicks's high-margin products. They said P&G would do this by dismissing many of the people in Vicks's distribution network and by distributing Vicks's products

through its own system. P&G's huge advertising budget, which allows it to command adverdisposable diapers, Duncan Hines tising discounts that a smaller comcookies and Citrus Hill orange pany, such as Richardson-Vicks, cannot, is also expected to help P&G improve the margins on

Vicks's products. Not even P&G's fabled market-P&G announced Tuesday that it had acquired Richardson-Vicks lnc, in a transaction worth about \$1.2 billion.

By purchasing Richardson-Vicks, P&G will seek to combine its impressive stable of personal and health care reaches to the second of personal and health care reaches to the second of personal and health care reaches to the second of personal and health care reaches to the second of personal and health care reaches to the second of personal and health care reaches to the second of personal and health care reaches to the second of personal and health care reaches to the second of personal and health care reaches to the second of personal and health care reaches to the second of personal and health care reaches to the second of personal and the second of personal

Mezzanine Capital Corporation

Limited Notice to the holders of the fully paid Bearer Depositary Receipts ("BDRs") evidencing Participating Redeemable Preference Shares of US1 cent each ("Shares") of Mezzanine Capital Corporation Limited (the "Company")

Notice of Dividend and Capital Repayment

Notice of Dividend and Capital Repayment

Notice Is HEREBY GIVEN to the holders of the BDRs that the
Company has declared a final dividend for the financial year to 31st
May, 1985 of \$0.5151 per Share. The BDRs are denominated in multiples of units ("Units") each Unit currently comprises 100 Shares.
The dividend is, therefore, equivalent to \$51.51 per Unit.
The Company has also given notice that it intends to redeem an
aggregate of 1,089,000 Shares at a price of \$10.0075 per Share.
This will involve the redemption of 11 Shares in respect of each Unit
and this capital repayment is equivalent to a further \$110.08 per Unit.
In accordance with Condition 6(B) of the conditions endorsed on
the BDRs the number of Shares comprising a Unit will, following the
redemption, be adjusted from 100 to 89. The number of Units evidenced by each BDR will remain unchanged.

Payment of dividends and of the capital repayment with be made,
subject to receipt thereof by Manufacturers Hanover Bank (Guernsey) Limited ("the Depositary"), egainst surrender of income Coupon
No. 3 and Capital Coupon No. 3, respectively, at the specified office
of the Depositary or of any of the Paying Agents (set out on tha
reverse of the BDRs and at the foot of this Notice), at any time on or
after 3rd October, 1985.

Payment will, in each case, be made, subject to any lews and/or
regulations applicable thereto by dollar cheque drawn upon or, at the
option of the holder of the relevant Coupon, by transfer to a dollar
account maintained by the payes with, a Bank in New York City.

Copies of the Company's annual report may also be obtained
from the Depositary and the Paying Agents.

BOR holders are advised that as a result of the capital repayment of \$110.08 per Unit, the net asset value per Unit of the Company will be reduced from \$1000.75 to \$880.67. BDR holders

ment of \$110.08 per Unit, the not asset value per Unit of the Com-pany will be reduced from \$1000.75 to \$890.67. BDR holders should note that the price per Unit quoted on the London Stock

\$1.4155 against an opening \$1.4270 desk. "We are looking at a period and Tuesday's close of \$1.4120. of aberration based upon massive

The bank forecast that the dollar due for an upward technical move, would firm against most major curdespite widespread wariness over rencies by the end of the year, rise central bank intervention. "I think one of the big banks has off toward the end of 1986. It to test the upside to see what the central banks will do," one dealer in Frankfurt said.

Interior by muc-1990 and unear tage. It to test the upside to see what the pegged the dollar at 2.70 DM and central banks will do," one dealer in Frankfurt said.

eign-exchange officers of Harris
Trust & Savings Bank predicted
Wednesday that the dollar's drop
on the heels of the Group of Five

In earlier trading Wednesday,
the dollar was fixed in Frankfurt at
2.6410 DM, down from 2.6778; at
on the heels of the Group of Five
8.054 French frames in Paris, down on the heels of the Group of Five 8.054 French francs in Paris, down currency accord will likely be from 8.1765, and at 2.977 Dutch short-lived.

"G-5 will not be a long-term factor," said Trevor Woodland, head

guilders in Amsterdam, down from 3.018. In Zurich, the dollar closed at 2.1565 Swiss francs, down from (Remers, IHT) of the bank's corporate advisory 2.1695.

Citibank Issue Is Increased to \$500 Million

LONDON - The main activity in the Eurobond market Wednesday was in the floating-rate-note sector, where the size of a Citibank issue was increased because of heavy demand.

Prices of both the FRN and dollar-straight sectors ended slightly firmer after another quiet day's trading, dealers said.

The Citibank issue was for \$350 million when it was launched in the afternoon. Demand was so great, however, that shortly after its introduction the issue was raised to \$500

The Citibank issue pays 221/2 basis points over the one-month Lon-don interbank bid rate. The 20-year issue, lead managed by Merrill Lynch Capital Markets, has no investor put options and is callable

after the third year.
One trader said the issue hit a high of around 99.89 prior to its increase, just outside the 10-basispoint total fees. It subsequently closed at 99.841/2, still well inside the 26-basis-point selling conces-

Another trader noted that as far

Japan May Cut Shipyards, Trim Output, Jobs

TOKYO - The Transport Ministry is planning a major review of Japan's shipbuilding industry, with the aim of reducing the number of shipyards

and increasing productivity, in-dustry sources said Wednesday. Ministry officials said the ministry this month would ask its Advisory Council for Rations Advisory Council for Ratio-nalization of the Shipping and Shipbuilding Industries to draw up plans to help the industry face an expected drop in orders in the coming years.

Japanese shipyards currently build half the world's new

ships. They received orders of 8.4 million gross tons in 1984, they said. The Shipbuilders Association of Japan has said there is currently a world oil-tanker surplus of about 100 million dead-

weight toos.
The association's president. Kazuo Maeda, said recently that shipyards may have to reduce their combined annual output to 3.3 million compensated gross registered tons from 4.3 million now to meet an expected fall in orders. The compensated measure is based on the weight of a standard cargo vessel and is used to calculate the work in building all ships. Mr. Maeda said the drop in output would mean cutting the national work force in shipbuilding to about 42,000 from 60,000 at present.

"Mr. Woodside is not unique,

but he is one of the most effective

and outspoken chief executives on

the need to do these kinds of

things," said Winthrop Knowlton, director of the Center of Business

and Government at Harvard Uni-

(Continued from Page 15) U.S. secretary of health, education and welfare and an American Can

Among other projects, the foun-dation is evaluating a local school meals program, financing a project to improve distribution of supplies to soup kitchens nationwide, planning a meeting of mayors and exec-utives on public education, and participating in a "partnership pro-gram" with Martin Luther King Jr. High School, an inner-city New York high school. Company execu-tives work on issues of business with students, who are urged, for example, to analyze American Can's annual reports. The company held last year's annual meeting at the high school, and invited stu-dents. "Over the past few years, I have come to know about half the kids there," Mr. Woodside said.

Not all of Mr. Woodside's favorite projects are universally ap-plauded. Opponents of Westway, for example, have argued that it was environmentally unsound and that the funds allotted for it would be better spent on improving mass transit. "I saw Westway as a way to versity and chairman of Harper & open up lower Manhattan, to clean Row. up and revitalize the West Side, which is pretty crummy down there," Mr. Woodside said.

The foundation's 1984 budget, about 1.6 percent of American Can's pretax earnings last year, has According to a study of the philancorporate donor gave less than I looked at gave over 1.5 percent," me int said Steven D. Lydenberg, a re-search assistant at the New York-things. based Council on Economic Priorities, a private research group.

DiMaggio and Arthur Miller, ended as unhappily as did her many attempts to have a child -The Secret Lives of Marilyn Monroe pregnancies she inexplicably terminated, Summers says, with at least a dozen abortions. By Anthony Summers. 415 pages. \$18.95. Summers has not much more to say about the Macmillan, 866 Third Avenue, New York, marriages than anyone else has, primarily because DiMaggio and Miller have kept their own counsel. Suffice it to say that each marriage probably was doomed from the start;

> Perhaps she believed that if she slept with famous and powerful men, she somehow would become what they were, If Summers is right that toward the end of her life she had affairs with John and Robert Kennedy, this would seem the most likely explanation. In considering these relationships, if they existed, Summers ventures into slippery and dangerous ground; not merely is it territory where most of those in the know are either silent or dead, but it involves the reputations of two political figures whose iconographies have remained remarkably unchanged notwithstanding continued, and sometimes devastating, attack.

Monroe, who so desperately wanted conjugal

and familial love, was simply incapable of the

commitment and constancy out of which it

That Monroe slept with John Kennedy no longer seems to be a matter of much doubt; apparently she was just one among many. But Robert, "never the womanizer his brother was," is a more complicated case. Summers, for what it is worth, believes that he "fell for the flickering light of Marilyn's fragile spirit," and that there was in fact an affair. He also believes that Robert was the recipient of a distress call, either direct or indirect, on the night Monroe died, and was involved in an effort to save her life - an effort that could have ended his political career had it been reported.

Summers is as entitled to his theories as anyone, and the case he makes for them is, if nothing else, advanced without frivolity; unlike some who have written about Monroe and the Kennedys, he has no political axes to grind, and he is engaged in no literary posturing. And, whether he is right about all the details, about the essential truth he appears to be absolutely correct. He quotes Laurence Olivier: "Popular opinion is a horribly unsteady

conveyance for life, and she was exploited beyond anyone's means." Whether the exploitation was by a studio executive, a political figure or merely a lover now unknown to us, it did not stop until she died. Though some may feel that "Goddess" merely continues that practice, it is too dispassionate and sympathetic to be thus dismissed.

the competition quiet for a year or two. Though much of what Summers has to say

about Monroe's celebrated life and mysterious

death is based on circumstantial evidence and

couched in cautious (not to mention graceless)

prose, his speculations are sufficiently plausi-

ble to make one wonder if enough has at last

"Goddess" is technically a biography, but

Summers has deliberately passed quickly over certain aspects of Monroe's life in order to

concentrate on others. He has little to say about her unhappy childhood, the details of

which have been reported exhaustively; he

spends only a few pages on her teen-age mar-

riage to Jim Dougherty, another familiar story;

and though he accepts at face value her rather

pathetic pretensions to serious acting, he does not have much to say about any of the movies

about which there is still much to be curious.

Sex is one of these, since the private sex life of

one of the century's most publicly sexual crea-

tures remains a subject of discussion and ru-

mor. Though sparing us the clinical details, Summers makes plain that Monroe's sex life was exceedingly active but not especially joy-

ous; she seems to have had no particular hang-

ups about sex, but it seems to have given her little pleasure. One former lover told Summers:

Marilyn must have been frustrated almost all

of the time. I think she regarded it as her

function, being this great attractive female.

that she was supposed to have sex with a man,

because that was something she could do, that

she could give. She wasn't very successful at it, in terms of her own fulfillment." Everything

Book Boom in Brazil

By Alan Riding

New York Times Service

RIO DE JANEIRO — A surge
of interest has been apparent
for the past two years, but the
crowds that flocked to the display
area of an elegant shopping mall here recently seemed to dramatize the point: In a country with little reading tradition, books have be-

come Brazil's latest fashion.
Parents took their children, friends agreed to meet there, visitors sought autographs of favorite authors and stocked up on supplies to last them through Christmas. For two weeks, Rio de Janeiro's Book Fair was the center of this city's busy cultural life.

The attendance — about 75,000 people in two weeks — surprised even its organizers. "We had hoped for about 20,000," Vander Soares of Editora Atica, a leading São Paulo-based publisher, said.

The book fair's success was merely a symptom of a boom that is bringing a 20-to-30-percent annual increase in sales of books of all genres, from serious nonfiction to poetry, from novels to children's literature. "The book culture is reaching out to the middle classes as well as to younger readers," one publisher said

inevitably, to judge by one edi-tor's estimate that 90 percent of Brazilian homes contain no books, reading remains a minority pas-time. Yet, with projected sales this year of 40 million nonacademic books, including more than 7,000 new titles, a sufficient market already exists to sustain the 116 Bra-zilian and 14 foreign publishers who rented space at the Rio Fair.

Newspapers give ample space to reviews of new titles and profiles of their authors, while television stations now dedicate entire programs to interviews with writers, both well-known figures like Jorge Amado and Carlos Drummond de Andrade and such new faces as Marcio Souza and João Ubaldo Ri-

Publishers, most of them still family businesses, have in turn be- a new market for new writers," Lagun adopting more modern mar- cerda said. First editions of works keting techniques to promote their by unknown authors usually run to books, sponsoring authors' tours to only 3,000 copies but, if sold out, usually forgotten provincial capi- even these leave publishers with a tals and looking for new sales out- small profit. lets in supermarkets and newspaper stands — to get around the fact that this country of 130 million inhabitants has fewer than 600

ing place during an economic crisis that has eroded purchasing power. But some publishers think this is contributing to the boom. "During moments of crisis, people turn more to books," Alfredo Machado, the owner of Editora Record, said. "On the one hand, books provide cheaper entertainment. On the other hand, people become more aware of the need to improve themselves, to become cultivated, to get better jobs.

Still more important is the return of democracy to Brazil in March after 21 years of military rule, during which all forms of cultural ex-pression, including books, were subject to censorship.

A wave of new books has also focused on the recent past. Among current nonfiction best sellers, for example, are "Brazil: Never Again," detailing human rights abuses under the military regime; "The Subversive Interest Rates" by Joelmir Beting, about Brazil's for-eign debt crisis, and "An Organized Fantasy," the memoirs of Celso Furtado, a leading economist and longtime opponent of the former dictatorship.

Some publishers have developed highly successful editions of cheap paperbacks — costing the equiva-lent of \$1 per copy — dealing with diverse subjects of public interest.

Fiction is also prospering, with such international names as Milan Kundera, Marguerite Duras, Richard Bach and Sidney Sheldon currently dominating the list of best seilers. "We're selling authors like Thomas Mann and T. S. Eliot who a few years ago were considered difficult," said Sergio Lacerda, co-owner of Editora Nova Fronteira, Brazil's largest publishing house.

More important to the current literary moment, though, is the fact that the public is becoming more receptive to Brazil's own novelists and poets. "Thanks to the best sellers, we can take the risk of creating

Julianne Baird: A Soprano Who Is Facinated by the Past

By Will Crutchfield

most exciting new prima donnas in opera is Julianne Baird. You won't be hearing her at the City Opera or at the Met. Her great roles have unfamiliar names (not Violetta or Mimi, but Gin-evra, Rosmene, Drusilla, Dafne and Eurilla). She belongs to the early-music movement - her voice might be called an "authennent" for Handel, Monteverdi and Purcell - and observers around the world are beginning to agree that she is helping to lead that movement into a new level of dramatic per-

Opera with original instrunents is still in its infancy, a movement on the fringe of the fringe. But Baird has scored a series of successes in it over the past four years; Handel at the Spoleto festival in Charleston, Monteverdi's "L'Incoronazione di Poppea" and Gluck's "Orfeo" with Concert Royal in New York, Purcell's "Fairy Queen" in To-ronto. She also performed in the controversial Joshua Rifkin recording of Bach's B Minor Mass, with one voice to a part, and re-cords document her style in Handel, Purcell and others.

Baird's next New York appearance is in concert with the authentic-instrument group Badinage, to play today at Merkin Hall. But it is essentially the opera singer, the interpreter of the great classical heroines, that her audience will hear. The vocal portion of the program consists of Giovanni Bononcini's "Lamento d'Olimpia" and Handel's cantata "Lu-

The latter, probably best known to modern listeners from the performances of Janet Baker. is as intense'a drama as many a full-length opera: Lucretia, raped by Tarquinius, struggles with her confusion, rage and shame, and kills herself, vowing vengeance from the grave.

The singer's fascination with the past dates almost from birth -her mother and steplather were medievalists teaching the history of language. "I grew up hearing "Oh! Ornaments!"

New York Times Service sic. In 1970 she went of the East-TEW YORK — One of the man School of Music in Rochesman School of Music in Rochester, New York, where she "had the good luck to be picked by a Baroque specialist, Erich Schwandt, who wanted a singer protégée." "He decided to teach me harpsichord by the book," she recalled, "after Rameau, using pedagogical techniques of the 18th century. He made me read everything from the original notaeverything from the original nota-tion, and I learned all the agri-

> This, and what she has gone on to do on her own, has helped to make Baird unique on the scene. Most revivalists realize the important role ornamentation played in the Baroque era, and some can distinguish between different styles of embellishment.

ornamentation.

But efforts to put it into practice meet a variety of obstacles. Singers are usually trained to be versatile nonspecialists, and if they are going to sing Henze. Wolf and Faure the night after Scarlatti they can hardly master the old ornamental styles so thoroughly as to make them their own. Usually they are singing or-naments written by someone else (perhaps with their cooperation), and learned, just as one would learn the original notes.

All too often the approach when writing these ornaments is something like: "Back then people took a lot of liberties, so let's do whatever comes into our heads." This often produces anachronistic embellishments that sound wrong to a sensitive ear. And that leads in turn to the opposite approach, equally unsat-isfactory: "Let's be very cautious lest we do something unstylish."

The only real solution is the one

Baird has taken: she has studied the old treatises with the discipline of a musicologist, for the purpose of throwing caution to the winds. Today, she can do what comes into her head because she can count on those things to be stylish. "Back then." she says, "it was all integrated, all a part of

virtuosity and expressive free-dom. In The Philadelphia Inquiror one reads of "the wildness and anguish that flashed through her singing." John Rockwell has writ-ten in The New York Times of her "tremendously desirous Drusilla and "voluptuously ornamented" Handel. Everyone agrees on her virtuosity as a coloratura singer.

The praise has not been unanimous. Baird sings with an "early music" sound — very little vibra-to, little of what many would hear menus," the highly developed sys-tem of French melodic as richness. For some, that sound carries such a connotation of academicism, caution and serless-ness. For others, it simply isn't pleasant to hear. Andrew Porter, a critic sympathetic to the early instrument movement, said he was divided between admiration for the soprano's style and "dis-like for the timbre of high notes that suggest the penetrating vi-bratoless ringing of musical glass-

> Baird says the "cautious" correciness some observers feel they see in the early music movement is more characteristic of the mainstream. "At Eastman," she says, "I thought, well. I can see the molds the way they are, and I don't fit. What should I do? We're fighting the same battle in a lot of areas in the real world; the safety in sameness. The McDonald's effect in America is scary."

For a singer who takes her extreme specialist's path, the career opportunities are limited. Even some Baroque revivalists find her sound hard to accept. "I went to study with Nikolaus Harnoncourt in Vienna, and what he had to teach about recitative declamation was very helpful, but he is no just was not using my kind of

Despite early discouragement, Baird was drawn to the stage. "After Harnoncourt," she recalled. "I decided that perhaps my calling was to be a musicologist. I went to Stanford for the doctoral program, and they did 'La Daine' of Gagliano. I played Cupid. I really got the bug then." The gap between academe and a performing career was bridged

Singer Baird: Fighting "safety in sameness."

in part by six years with the Waverly Consort, starting in 1978. Though as a scholar she did not always agree with the group's approach to performance practice, she found the experience invaluable. They were going around everywhere with early music, put-ting it across to audiences." Now she free-lances, living with her husband in Philadelphia but commuting regularly to New York to teach aspiring Baroque singers.

Baird is now considering branching out toward the daring-ly modern music of Mozart. She has already done some songs and an early opera, and thinks she might venture Susanna in an orig-inal-instrument "Marriage of Figaro." Whatever she does is not likely to be cautious. "One has to go to extremes, to effect a break." she says, "only then do we become brave enough to let individ-ual expression in."

PEOPLE

Hinckley Said to Plan Marriage With Patient

John W. Hinckley Jr., 30, who shot President Rouald Reagan in 1981, is reportedly engaged to be married to Leslie DeVeau, a 42year-old patient at the mental institution where he is committed, according to reports by NBC News. However her attorney, Mark Carlin, said the report is "categorically untrue." The network reported that officials said Hinckley has overcome his obsession with Jodie Foster. Hinckley shot Reagan on March 30, 1981, in an effort to improve the course of t impress the actress, who started in "Taxi Driver" and was then a college student. NBC, quoting officials at St. Elizabeths Hospital in " Washington, said DeVeau killed her 10-year-old daughter. The Washington Post said DeVeau, is mentioned in "Breaking Points," Hinckley's parents' book about their ordeal after their son shot the president. They describe DeVeau as one of those who have "encouraged us through their letters, prayers and expressions of love. Hinckley was found not guilty by reason of insanity in the case. Chantal Nobel, the star of France's "Chateauvallon" TV se-

ries until she was injured in a car crash five months ago, married Jean-Louis Jullian, a Nice jeweler, in Cannes on Tuesday. Their 4year-old daughter, Anne-Charlotte, attended the ceremony. It was ful-lian's second marriage. Nobel, who was in a deep come for three weeks, is suing the French actor Sacha Distel, driver of the car.

Gene Pell, director of the Voice of America, said on Tuesday he is resigning his post to become presi-dent of another U. S. government-sponsored broadcast service, Radio Free Europe and Radio Liberty. As head of Voice of America for a year, Poll was in charge of the start of Radio Marti, the U.S. administration's news service aimed at Cuba, which went on the air on May 20. Pell, 48, joined the VOA as director of news and current affairs in 1982. He left briefly to serve as Washington correspondent of WCVB, a Boston radio station, returning to the VOA in 1983 to become deputy director for programs. He was named acting director of the VOA in September, 1984. In his new position, Pell will be based at RFE headquarters in Munich. He has also served as Moscow correspondent for NBC News.
